

MELT CONE FAT TABLE SILVER LED

Melt is evocative of molten glass, the interior of a melting glacier or images of deep space. An imperfect, organic and naturalistic light that produces a mesmerizing hot-blown glass effect. A perfectly executed metal cone becomes the most appropriate and elegant platform to support and enhance a multitude of different possibilities from our range of metallic polycarbonate shades, including a new tinted white opalescent finish, boosting its luminosity. Melt Cone Fat is available in a new hyper-polished and reflective silver finish.
