

ODETTE CONSOLE

1017-CO

Odette Collection draws inspiration from the enduring structures of Eastern architecture and objects, offering an appreciation for both cultural heritage and lasting craftsmanship. Crafted entirely from solid wood, the legs feature hand-finished convex and concave details, creating a visual illusion timber jostling against one another. Reinforced with a supporting beam, the traditional trapezoid-shaped legs provide a strong and dependable foundation, while other timber details give Odette a striking resemblance to a pagoda's gate.
